

OBJECTIVE

The Hood River New Opportunities Fund (“the Fund”) seeks long-term capital appreciation by investing in stocks with market capitalizations typically below \$10 billion exhibiting strong growth characteristics and attractive valuation relative to underlying profitability. Hood River Capital Management LLC (“Hood River”) serves as the advisor to the Fund.

INVESTMENT PHILOSOPHY

Hood River believes the small/mid-cap market is inefficient. Our process is designed to identify and capitalize on inconsistencies between our expectations and Wall Street estimates. We construct portfolios of high-quality companies that we believe can grow earnings at least 15%, are trading at attractive valuations, and are likely to surprise other investors with better-than-expected sales and earnings.

INVESTMENT CONSIDERATIONS

All investing includes risk, including the loss of principal. The Fund invests in small-cap and mid-cap securities which present a greater risk of loss than large-cap securities, and in growth companies which can be more sensitive to the company’s earnings and more volatile than the stock market in general. The Fund may also invest in foreign securities which are subject to risks including currency fluctuations, economic and political change and differing accounting standards. The Fund may invest in derivatives and IPOs, which are highly volatile. Additional risk information may be found in the prospectus. The Fund is a recently organized investment company with no operating history. As a result, prospective investors have no track record or history on which to base their investment decision.

The benchmark is the Russell 2500® Growth Index, defined as a broad index featuring 2,500 stocks that cover the small and mid-cap market capitalizations. The index has a market cap weighted index that includes the smallest 2,500 companies covered in the Russell 3000 universe of United States-based listed equities. The Russell 2500® Growth Index is designed to measure the performance of those Russell 2500 companies with higher price-to-book ratios and higher forecasted growth values. Index returns include dividends and/or interest income and do not reflect fees or expenses. Investors cannot directly invest in an index.

Investors should carefully consider the Fund’s investment objective, risks, charges, and expenses before investing.
