Hood River Small-Cap Growth Fund

Institutional Shares Ticker: HRSMX

Investor Shares Ticker: HRSRX

Retirement Shares Ticker: HRSIX

Before you invest, you may want to review the Prospectus for the Hood River Small-Cap Growth Fund (the “Fund”), which contains more information about the Fund and its risks. The Fund’s Prospectus and Statement of Additional Information, each dated October 31, 2021 (as each may be amended or supplemented), are incorporated by reference into this Summary Prospectus. You can find the Fund’s Prospectus, reports to shareholders, and other information about the Fund (including the Fund’s Statement of Additional Information) online at www.hoodrivercapital.com/fund-materials. You can also obtain this information at no cost by calling (800) 497-2960 or by sending an e-mail request to info@hoodrivercapital.com.

INVESTMENT OBJECTIVE

The Hood River Small-Cap Growth Fund (the “Fund”) seeks superior long-term growth of capital.

FEES AND EXPENSES OF THE FUND

This table describes the fees and expenses that you may pay if you buy, hold, and sell shares of the Fund. **You may pay other fees, such as brokerage commissions and other fees to financial intermediaries, which are not reflected in the table and Example below.**

Annual Fund Operating Expenses

(expenses that you pay each year as a percentage of the value of your investment):

Management Fees

Distribution (12b-1) and/or Service Fees¹

Shareholder Servicing Fee²

Other Expenses

Total Annual Fund Operating Expenses

Fee Waivers/Expense Reimbursements³

Total Annual Fund Operating Expenses After Fee Waivers/Expense Reimbursements

	<u>Institutional Shares</u>	<u>Investor Shares</u>	<u>Retirement Shares</u>
Management Fees	0.90%	0.90%	0.90%
Distribution (12b-1) and/or Service Fees ¹	None	0.17%	None
Shareholder Servicing Fee ²	0.10%	0.10%	None
Other Expenses	0.09%	0.10%	0.10%
Total Annual Fund Operating Expenses	1.09%	1.27%	1.00%
Fee Waivers/Expense Reimbursements ³	-0.01%	-0.01%	-0.01%
Total Annual Fund Operating Expenses After Fee Waivers/Expense Reimbursements	1.08%	1.26%	0.99%

¹ Investor Shares are subject to a Rule 12b-1 fee of up to 0.25%. The current fee rate of 0.17% will remain in place at least through October 31, 2022.

² The Fund has implemented a Shareholder Servicing Plan on behalf of its Institutional Shares and Investor Shares that allows the Fund to make payments of up to 0.10% for Institutional and Investor Shares to financial intermediaries and other service providers for Institutional and Investor shareholders in return for shareholder servicing and maintenance of Institutional and Investor shareholder accounts. Total Annual Fund Operating Expenses do not correlate to the Fund’s ratio of operating expenses to average net assets in the Fund’s Financial Highlights, which reflects the operating expenses of the Fund and may reflect a lower amount than the permitted 0.10%.

³ Hood River Capital Management LLC (“Hood River” or the “Adviser”), the Fund’s investment adviser, has contractually agreed to waive a portion of its fees and reimburse certain expenses for the Fund to limit the total annual fund operating expenses (excluding taxes, Rule 12b-1 fees, shareholder servicing fees, extraordinary expenses, brokerage commissions, interest and acquired fund fees and expenses (collectively, “Excludable Expenses”)) to 0.99%. To the extent the Fund or a share class of the Fund incurs Excludable Expenses, Total Annual Fund Operating Expenses After Fee Waivers/Expense Reimbursements may be greater than 0.99%. The waivers and reimbursements will remain in effect through October 31, 2022 unless terminated sooner by mutual agreement of the Fund’s Board of Trustees (the “Board”) and Hood River. Effective for the period beginning January 1, 2021, the Adviser may request recoupment of previously waived fees and paid expenses from the Fund for 36 months from the date such fees and expenses were waived or paid, if such reimbursement will not cause the Fund’s total expense ratio to exceed the expense limitation in place at the time of the waiver and/or expense payment and the expense limitation in place at the time of the recoupment.

EXAMPLE

This Example is intended to help you compare the cost of investing in the Fund with the cost of investing in other mutual funds. The Example assumes that you invest \$10,000 in the Fund for the time periods indicated and then redeem all of your shares at the end of those periods. The Example also assumes that your investment has a 5% return each year and that the Fund’s operating expenses remain the same. The fee waiver/expense reimbursement arrangement included in the table above is reflected through October 31, 2022). Although your actual costs may be higher or lower, based on these assumptions, your costs would be:

	<u>1 Year</u>	<u>3 Years</u>	<u>5 Years</u>	<u>10 Years</u>
Institutional Shares	\$110	\$346	\$600	\$1,328
Investor Shares	\$128	\$402	\$696	\$1,533
Retirement Shares	\$101	\$317	\$551	\$1,224

PORTFOLIO TURNOVER

The Fund pays transaction costs, such as commissions, when it buys and sells securities (or “turns over” its portfolio). A higher portfolio turnover rate may indicate higher transaction costs and may result in higher taxes when Fund shares are held in a taxable account. These costs, which are not reflected in the annual fund operating expenses or in the Example, affect the Fund’s performance. For the fiscal year ended June 30, 2021, the Fund’s portfolio turnover rate was 119% of the average value of its portfolio.

PRINCIPAL INVESTMENT STRATEGIES

The Fund, under normal market conditions, invests at least 80% of its net assets plus any borrowings for investment purposes in common stocks of U.S. corporations that are judged by Hood River to have strong growth characteristics or to be undervalued in the marketplace relative to underlying profitability and have a market capitalization which, at the time of purchase, is consistent with the capitalization ranges of the S&P SmallCap 600® Index and the Russell 2000® Growth Index (“small-cap companies”). Although the Fund does not invest in derivatives as part of its principal investment strategy, the Fund may include in its 80% calculation derivative investments that are tied economically to small-cap companies.

The Fund may purchase securities of companies engaged in initial public offerings (“IPOs”). The Fund may also invest in equity securities of Special Purpose Acquisitions Corporations (“SPACs”) and companies derived from SPACs. SPACs (also known as “blank check companies”) are companies with no commercial operations that are established solely to raise capital from investors for the purpose of acquiring one or more operating businesses (*i.e.*, a SPAC-derived company). The Fund may invest in securities that are purchased in private investment in public equity (“PIPE”) transactions.

The Fund may from time to time invest in foreign securities including American Depositary Receipts (“ADRs”), and in convertible securities, including preferred stock, warrants and debentures.

The Fund may invest in the securities of other investment companies, including exchange-traded funds (“ETFs”), to the extent permitted by the Investment Company Act of 1940, as amended (the “1940 Act”), and the rules thereunder.

In selecting securities, the research process utilized by Hood River begins by screening a universe of stocks with market capitalizations of generally less than \$5 billion which exhibit strong growth characteristics and attractive valuation relative to underlying profitability. Hood River then performs fundamental and valuation analysis and additional research to select stocks for the Fund.

The Fund maintains a portfolio of approximately 60-120 stocks, which is constructed with the overall goal of mitigating risk. However, the actual amount of the portfolio holdings may vary due to market conditions.

Hood River periodically engages in active trading of Fund securities.

Hood River generally sells stocks when it believes they have become overvalued, when the fundamentals weaken or if poor relative price performance persists.

As of September 30, 2021, the average weighted market capitalization represented by companies in the Russell 2000® Growth Index was approximately \$3.85 billion, and the average weighted market capitalization represented by companies in the S&P SmallCap 600® Index was \$1.84 billion. Due to market price adjustments or other events after the time of purchase, it is possible that a company’s market capitalization may drift above or below this range. Nevertheless, a company whose capitalization no longer meets this definition after purchase continues to be considered to have a small market capitalization for purposes of the 80% policy. The Fund may invest up to 20% of its total assets in stocks of companies in other capitalization ranges.

PRINCIPAL RISKS

Before investing in the Fund, you should carefully consider your own investment goals, the amount of time you are willing to leave your money invested, and the amount of risk you are willing to take. Remember, in addition to possibly not achieving your investment goals, you could lose all or a portion of your investment in the Fund over long or even short periods of time. The principal risks of investing in the Fund are:

- **General Market Risk; Recent Market Events.** The value of the Fund’s shares will fluctuate based on the performance of the Fund’s investments and other factors affecting the securities markets generally. Certain investments selected for the Fund’s portfolio may be worth less than the price originally paid for them, or less than they were worth at an earlier time. The value of the Fund’s investments may go up or down, sometimes dramatically and unpredictably, based on current market conditions, such as real or perceived adverse political or economic conditions, inflation, changes in interest rates, lack of liquidity in the fixed income markets or adverse investor sentiment.

U.S. and international markets have experienced significant periods of volatility in recent months and years due to a number of economic, political and global macro factors, including the impact of the coronavirus (COVID-19) global pandemic which resulted in a public health crisis, business interruptions, growth concerns in the U.S. and overseas, travel restrictions, changed travel and social behaviors, rising inflation, and reduced consumer spending. While U.S. and global economies are recovering from the effects of COVID-19, the recovery is proceeding at slower than expected rates and may last for a prolonged period of time.

- **Equity Risk:** Common stocks and other equity securities generally increase or decrease in value based on the earnings of a company and on general industry and market conditions. A fund that invests a significant amount of its assets in common stocks and other equity securities is likely to have greater fluctuations in share price than a fund that invests a significant portion of its assets in fixed income securities.
- **Small Company Risk:** The Fund is subject to greater volatility than funds that invest in large-cap companies. Small-cap companies may be more vulnerable than large-cap companies to adverse business or economic developments, their securities may be less liquid and more volatile than securities of larger companies, and they may suffer significant losses. Small-cap companies may also be more difficult to value than large-cap companies.
- **Growth Investing Risk:** Growth stocks are typically priced higher than other stocks, in relation to earnings and other measures, because investors believe they have more growth potential. Growth prices tend to fluctuate more dramatically than the overall stock market.
- **Management Risk:** The performance of the Fund will depend on whether or not Hood River is successful in pursuing the Fund’s investment strategies.
- **Sector Emphasis Risk:** Although Hood River selects stocks based on their individual merits, some economic sectors will represent a larger portion of the Fund’s overall investment portfolio than other sectors. Potential negative market or economic developments affecting one of the larger sectors could have a greater impact on the Fund than on a fund with fewer holdings in that sector.
- **Valuation Risk:** It is possible to lose money by investing in the Fund. There is no guarantee that stocks in general or the specific securities that the Fund buys will increase in value.
- **Foreign Security Risk:** Investments in a foreign market are subject to foreign security risk. A change in value of a foreign currency against the U.S. dollar will result in a change in the U.S. dollar value of securities denominated in that foreign currency. Additionally, the value of foreign investments may be affected by exchange control regulations, expropriation or nationalization of a company’s assets, foreign taxes, higher transaction and other costs, delays in settlement of transactions, changes in economic or monetary policy in the U.S. or abroad, or other political and economic factors. Income and dividends earned on foreign investments may be subject to foreign withholding taxes.
- **ADR Risk:** ADRs are certificates evidencing ownership of shares of a foreign issuer. These certificates are issued by depository banks and generally trade on an established market in the U.S. or elsewhere. The underlying shares are held in trust by a custodian bank or similar financial institution. The depository bank may not have physical custody of the underlying securities at all times and may charge fees for various services, including forwarding dividends and interest and corporate actions. ADRs are alternatives to directly purchasing the underlying foreign securities in their national markets and currencies. However, ADRs continue to be subject to many of the risks associated with investing directly in foreign securities. These risks include foreign exchange risk as well as the political and economic risks of the underlying issuer’s country.
- **IPO Risk:** The Fund may purchase securities of companies engaged in IPOs. The price of securities purchased in IPOs can be very volatile. The Fund’s investments in IPO shares may include the securities of “unseasoned” companies (companies with less than three years of continuous operations), which present risks considerably greater than common stocks of more established companies. These companies may be involved in new and evolving businesses and may be vulnerable to competition and changes in technology, markets and economic conditions. They may be more dependent on key managers and third parties and may have limited product lines. The effect of IPO

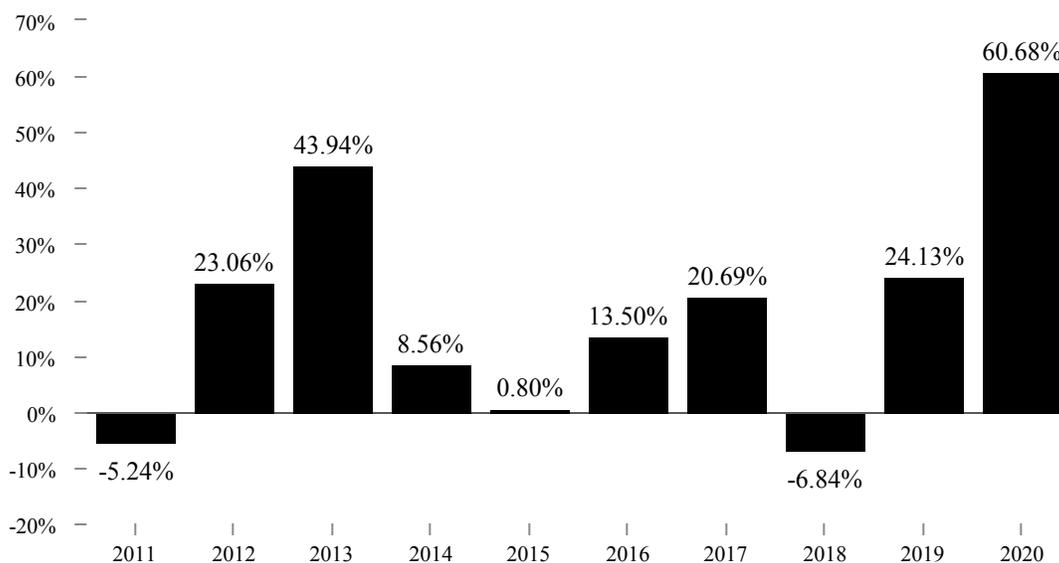

investments on the Fund's performance depends on a variety of factors, including the number of IPOs the Fund invests in relative to the size of the Fund, and whether and to what extent a security purchased in an IPO appreciates or depreciates in value. When the Fund's asset base is small, a significant portion of the Fund's performance could be attributable to investments in IPOs because such investments would have a magnified impact on the Fund. As the Fund's assets grow, the effect of the Fund's investments in IPOs on the Fund's performance probably will decline, which could reduce the Fund's performance.

- **SPAC Investments Risk.** SPACs are “blank check” companies with no operating history and, at the time that the Fund invests in a SPAC, the SPAC typically has not made any arrangements with any prospective transaction candidates. Accordingly, there is a limited basis (if any) on which to evaluate the SPAC's ability to achieve its business objective. Because SPACs have no operating history or ongoing business other than seeking acquisitions, the value of their securities is particularly dependent on the ability of the entity's management to identify and complete a profitable acquisition. There is no guarantee that the SPACs in which the Fund invests will complete an acquisition or that any acquisitions that are completed will be profitable.
- **SPAC-Derived Companies Risk.** Companies derived from a SPAC are companies that may be unseasoned and lack a trading history, a track record of reporting to investors, and widely available research coverage. SPAC-derived companies are thus often subject to extreme price volatility and speculative trading.
- **PIPEs Risk:** Shares in PIPES generally are not registered with the SEC until after a certain time period from the date the private sale is completed. Until the public registration process is completed, PIPEs are restricted as to resale and the Fund cannot freely trade the securities. There is no assurance that these restricted equity securities will be publicly registered, or that the registration will remain in effect.
- **Preferred Securities Risk:** Preferred securities may pay fixed or adjustable rates of return and are subject to many of the risks associated with debt securities. Preferred securities are also subject to issuer-specific and market risks applicable generally to equity securities. Because many preferred securities allow the issuer to convert their preferred security into common stock, preferred securities are often sensitive to declining common stock values.
- **Cybersecurity Risk:** With the increased use of technologies such as the Internet to conduct business, the Fund is susceptible to operational, information security, and related risks. Cyber incidents affecting the Fund or its service providers may cause disruptions and impact business operations, potentially resulting in financial losses, interference with the Fund's ability to calculate its net asset value (“NAV”), impediments to trading, the inability of shareholders to transact business, violations of applicable privacy and other laws, regulatory fines, penalties, reputational damage, reimbursement or other compensation costs, or additional compliance costs.
- **Portfolio Turnover Risk:** The Fund engages in active and frequent trading, resulting in high portfolio turnover. The higher the Fund's portfolio turnover rate in a year, the greater the trading costs and the greater the chance of a shareholder receiving distributions of taxable gains in the year.
- **Liquidity Risk:** Certain securities may be difficult or impossible to sell at the time and the price that the Fund would like. Securities of small-cap companies may trade less frequently and in smaller volumes than more widely held securities. The values of these securities may fluctuate more sharply than those of other securities, and the Fund may experience some difficulty in establishing or closing out positions in these securities at prevailing market prices.
- **Other Investment Companies Risk:** You will indirectly bear fees and expenses charged by underlying investment companies in addition to the Fund's direct fees and expenses. As a result, your cost of investing in the Fund will be higher than the cost of investing directly in the underlying investment company shares.
- **ETF Risk:** When the Fund invests in ETFs, it will bear additional expenses based on its pro rata share of the ETF's operating expenses, including the potential duplication of management fees. The risk of owning an ETF generally reflects the risks of owning the underlying investments the ETF holds. The Fund also will incur brokerage costs when it purchases and sells ETFs. ETFs may trade at a discount or premium to net asset value.
- **Operational Risk:** Operational risks include human error, changes in personnel, system changes, faults in communication, and failures in systems, technology, or processes. Various operational events or circumstances are outside the Adviser's control, including instances at third parties. The Fund and the Adviser seek to reduce these operational risks through controls and procedures. However, these measures do not address every possible risk and may be inadequate to address these risks.

PERFORMANCE INFORMATION

The bar chart and performance table below illustrate the risks and volatility of an investment in the Fund by showing changes in the performance of the Fund from calendar year to calendar year and by showing how the Fund's average annual returns for one year, five years, ten years, and since inception periods compared with those of the Russell 2000® Growth Index, which is a broad measure of market performance. This performance information includes performance of the Fund's predecessor, the Roxbury Small Cap Growth Fund (a series of WT Mutual Fund) (the "Predecessor Fund"), for periods prior to February 2, 2007. From inception (January 2, 2003) to May 30, 2013, the Fund was managed by the Small-Cap Growth Investment Team of Roxbury Capital Management, LLC ("Roxbury"), the Fund's predecessor investment adviser. In 2013, Roxbury's Small-Cap Growth Investment Team formed Hood River and Hood River became the Fund's sub-adviser effective May 30, 2013. Effective January 20, 2015, Hood River replaced Roxbury as the primary investment adviser to the Fund. The Fund's past performance, both before and after taxes, does not necessarily indicate how the Fund will perform in the future. Updated performance information is available on the Fund's website at www.hoodrivercapital.com or by calling (800) 497-2960.

Institutional Shares of the Fund commenced operations on January 2, 2003. Investor Shares of the Fund commenced operations on July 7, 2015. Performance shown for Investor Shares prior to inception (July 7, 2015) reflects the performance of Institutional Shares, and does not include expenses of the Investor Shares, which are higher than those of the Institutional Shares. Performance shown for Retirement Shares prior to inception (March 3, 2017) reflects the performance of Institutional Shares, and includes expenses of the Institutional Shares, which are higher than those of the Retirement Shares. The performance of the Investor Shares and Retirement Shares will differ from that of Institutional Shares due to differences in expenses.

After-tax returns are calculated using the historical highest individual federal marginal income tax rates and do not reflect the impact of state and local taxes. Actual after-tax returns depend on an investor's tax situation and may differ from those shown, and after-tax returns shown are not relevant to investors who are exempt from tax or hold their Fund shares through tax-deferred arrangements such as 401(k) plans or individual retirement accounts ("IRAs"). The after-tax returns are shown for Institutional Shares only and after-tax returns for Investor Shares and Retirement Shares will vary.

INVESTMENT ADVISER

Hood River Capital Management LLC

PORTFOLIO MANAGERS

Brian P. Smoluch, CFA

Portfolio Manager of the Fund, is responsible for the day-to-day management of the Fund's portfolio and has managed the Predecessor Fund from January 2003 to February 2007 and the Fund since February 2007.

David G. Swank, CFA

Portfolio Manager of the Fund, is responsible for the day-to-day management of the Fund's portfolio and has managed the Fund since April 2009.

PURCHASE AND SALE OF FUND SHARES

The minimum initial investment for Institutional Shares of the Fund is \$25,000 and the minimum initial investment for Investor Shares of the Fund is \$1,000. There is no minimum initial investment for Retirement Shares of the Fund. Additional investments may be made in any amount.

A shareholder may sell (redeem) shares on any Business Day. Shares may be redeemed in one of the following ways:

TAX INFORMATION

The Fund's distributions will be taxed as ordinary income or capital gains, unless you are investing through a tax-deferred arrangement, such as a 401(k) plan or an individual retirement account ("IRA"). You may be taxed later upon withdrawal of monies from such tax-deferred or other tax-advantaged arrangements.

PAYMENTS TO BROKER-DEALERS AND OTHER FINANCIAL INTERMEDIARIES

If you purchase Fund shares through a broker-dealer or other financial intermediary (such as a bank), the Fund, the Adviser and their related companies may pay the intermediary for the sale of Fund shares and related services. These payments may create conflicts of interest by influencing the broker-dealer or other intermediary and your salesperson to recommend the Fund over another investment. Ask your salesperson or visit your financial intermediary's website for more information.
